Project & Portfolio Intelligence

Innovation for PPM

resultspositive
Business Technology Solutions

Utilize PPI's BI solution including the data mart, ETL processes, report metadata and ready to use reports and dashboards within 5 to 10 business days.

PPI Architecture

PPI is a plug and play solution with HP PPM that enables organizations to access ad-hoc reporting metadata, transform data into the data mart, and provide real-time visibility into content from the PPM Report.

PPI Key Features

- *60+ Built-in Reports, Dashboards and Templates*
- *Efficiency Benchmarking*
- *Business Objects and Cognos platform support*
- *AD-HOC Reporting Capability*
- *Security Adapter for HP PPM*
- *High Performance*
- *Historical Data Mart*
- *Self Service reporting based on User Data*

Challenge

Technology has increasingly become the driving force behind productivity improvements and business growth. The need to manage the enterprise effectively, especially as it relates to production resources, has never been more critical to the success of your business.

Business Insight

ResultsPositive's PPI solution provides visibility into critical information and helps project managers and business units collaboratively govern multiple levels of performance data. By automating and optimizing strategic reporting, PPI helps bridge the gap between IT, PMO and the lines of business to ensure your initiatives are fully aligned with business goals and priorities.

PPI Benefits for Business & IT

Discover how Project & Portfolio Intelligence (PPI) can enable your organization to accurately and efficiently analyze business results and collaborate across all levels of your organization.

See how PPI allows you to make informed business decisions that create positive business outcomes.

- Deliver relevant, timely, and actionable information
- Automate collection and analysis of data to reduce errors
- Identify resource allocation and cost savings
- Support best-practice framework that allows you to measure and improve project performance
