Full Mobility Lifecycle

Mobile Services

ResultsPositive provides full lifecycle mobile application development services from design, development, functional & performance testing, security testing, application monitoring to hosting and application support services.

Mobile App Development

We utilize a unique design approach centered on understanding business requirements and desired business outcomes that are then built into mobile wire frame & prototype designs. The designs are then run through a series of functional and end user usability tests including feedback sessions with internal and external stakeholders. The end results are easy to use, functional designs that delight our customers.

From initial design to deployment and beyond, ResultsPositive has a team of developers that are ready to build your mobile applications. Utilizing an agile development approach, you have access to real time visibility into the progress of your application. With service like that, we can ensure success in all phases of Mobile application, from initial design to deployment, support, and maintenance.

Mobile App Testing

We provide industry leading functional performance and security testing services utilizing HP UFT, Perfecto Mobile, Shunra, and HP Fortify.
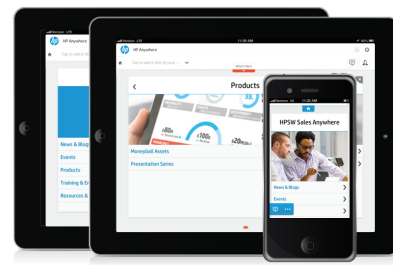

Application Monitoring & Hosting Services

Take advantage of the same monitoring and hosting services we provide to our enterprise customers to enable cost effective, scalable hosting solutions for your mobile applications.
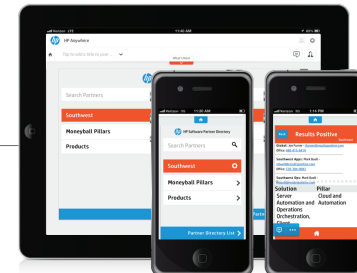

Application Support

We have been providing application support services to our enterprise customers for over eight years. We provide the same level of application support and maintenance for our mobile application customers. Our customers continue to provide us with 100% customer satisfaction ratings.
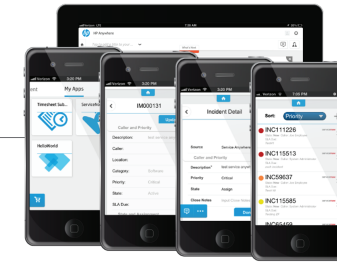

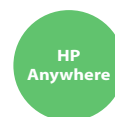

SALESANYWHERE

The Sales Anywhere App provides HP Software Sales teams with mobile access to solution overviews, training enablement, and resources to prepare for customer presentations.
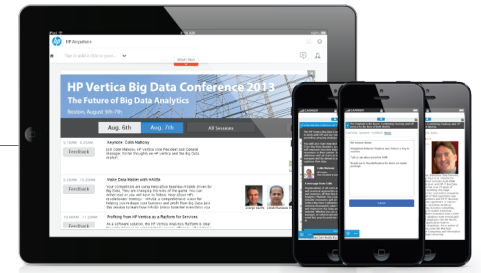

HP Anywhere

HP PARTNER DIRECTORY

The HP Partner Directory App enables HP users with mobile access to a comprehensive listing of partners which can be filtered by moneyball pillars, products, and region.

HP Anywhere

SERVICENOMAD

ServiceNomad is an enterprise mobile support portal app for service technicians where they can manage all assigned support tickets coming from one or many internal service desk applications.

HP Anywhere

HP VERTICA BIG DATA CONFERENCE

The HP Vertica Big Data Conference App was built exclusively for event attendees to enable mobile access to speaker information and the conference agenda. Attendees could also communicate and collaborate with HP product specialists using the built in collaboration capabilities.
