

Oracle LMS Rapid Start Implementation Packages

HP Universal Discovery (UD)
HP Asset Manager (AM)

SOLUTIONS

HP Universal Discovery (UD)
HP Asset Manager (AM)

AT A GLANCE

Eliminate the need for Oracle on-site audits with HP Universal Discovery, an Oracle Corporation verified solution to collect usage & license metrics and manage software assets for Oracle Database, database options, and hardware information.

HP Universal Discovery for Oracle License Management Implementation Software provides clients with a convenient and cost-effective approach that provides clients with continuous value and peace of mind.

Managing Your Oracle License Compliance

Year after year many organizations are faced with Oracle licensing compliance risks and annual audits. These audit costs can be steep and consume up to 6 weeks of on-site time. For those organizations that are found noncompliant, penalties can be severe resulting in hefty fines, paying list price for true up licensing and support, and even worse, having their Oracle Partner Network Agreement status and sublicense rights terminated. In short, noncompliance can result in a lose/lose situation for both Oracle and Oracle clients. In order to prevent this, Oracle clients are faced with several challenging questions including:

- How do we discover all Oracle database instances across the network?
- How do we identify all the options and management packs we use?
- How do we find all the CPU and core details in all servers where Oracle is installed?
- How do we understand all the “hard” and “soft” partitioning rules in virtualized and partitioned environments?
- Is there a way to accurately interpret the information discovered?

The Power of HP Universal Discovery (UD)

With HP Universal Discovery (UD), you now have an efficient and cost effective answer that will allow you to successfully manage your Oracle license audit reporting requirements. Discover how HP UD can enable your organization to:

- Collect usage & license metrics
- Manage software assets for Oracle Database, database options, and hardware information
- Eliminate Oracle on-site audits

How it Works

As an Oracle verified solution, HP UD supports discovery efforts, data collection, and offsite processing, providing customers with all the required metrics in a matter of hours to fulfill Oracle audit reporting requirements. HP UD also provides clients with the ability to export and send bundled technical reports to Oracle for official verification. When integrated with HP Asset Management (AM), clients additionally gain real time capability to manage license compliance. With HP UD and AM, discover the peace of mind that comes from a more effective and efficient audit and license compliance management approach.

ResultsPositive is a leader in Strategy, Planning, and Governance, Application Lifecycle Management, Business Intelligence, Mobility, Operations Management, and Cloud & Automation solutions to medium sized and Fortune 500 companies. As both an HP Platinum Partner and HP ASMP-S Support Provider, ResultsPositive has the experience, support, and training necessary to turn complex IT processes into tangible business solutions.

ResultsPositive Oracle LMS Rapid Start Implementation Packages

ResultsPositive's 2 to 3 week HP UD Oracle LMS Rapid Start Program includes installation, setup, and configuration of HP's Universal Discovery with HP universal Configuration Management Data Base (UCMDB) followed by discovery runs, validation & correlation mapping, and mentoring & training services. The end result is a set of Oracle "verified" License Management System reports meeting Oracle license audit requirements. Rapid Start Program details include:

HP Universal Discovery & UCMDDB Installation

- Install HP UD & UCMDDB at customer site
- Install Oracle LMS solution package in HP UD

Setup, Configuration, and Discovery Preparations

- Set up one HP UD instance
- Setup user accounts and credentials
- Configure HP UD with target system access rights & privileges
- Collect target environment IP addresses for discovery activities

Perform Auto Discovery, Validation, and Oracle LMS Report

- Discover Oracle App & Database environments
- Review & validate discovery results
- Correlate & map Oracle environments
- Generate Oracle LMS Report
- Review verified Oracle LMS Report with customer

Mentoring & Training Sessions

- How to maintain HP UD
- How to perform simple Oracle Apps/Database update discoveries
- How to create Oracle LMS reports
