

Enterprise Project Management for Business and Technology

Improving Collaboration with HP PPM

Case Study

Prior to engaging ResultsPositive, the challenge of the Business and Technology processes co-existing in one PPM system seemed impossible. ResultsPositive's design made it seamless and its simplicity with automation between the workflows reduced the complexity for the groups to interact effortlessly within the Cox Portfolio!

Quality and Control Director

SOLUTIONS

HP Project and Portfolio Management

INDUSTRY

Cable and Satellite TV Production and Distribution

The Opportunity

Cox Communications had been successfully running HP Project and Portfolio Management for years on the Business side. When Technology planned to implement HP PPM, the customer was presented with the following challenges:

- Both Technology and Business had existing business processes that would need to coexist in PPM
- Business had existing processes that were already automated within PPM
- Business and Technology wanted to maintain current processes as well as improve data sharing and collaboration
- The need to remove dual entry to maintain shared data

The Solution

ResultsPositive provided Project and Portfolio Management consulting services and delivered on the following initiatives:

- Developed a single instance
- Maintained existing Business implementation and process
- Implemented new IT business processes
- Synchronized data sharing through automation
- Improved collaboration and communication on shared project activity
- Created a flexible design that allowed for other business units to share the integrated solution
