

KEEPING YOUR INFRASTRUCTURE IN-HOUSE

IT leaders are often pressured to seek off-premises solutions, but that's not always the best answer.

CIOs have to balance a competing list of tech priorities

Mobility, cloud computing and Big Data are forcing CIOs to rethink the delivery of IT services to balance business demands. These trends are disruptive, forcing CIOs to evolve their IT infrastructure. They say **some of the biggest challenges today are:**

CapEx

Too expensive to add capacity & performance

Complexity

Too many legacy processes and manual interventions

Speed

Too slow to deploy new IT services

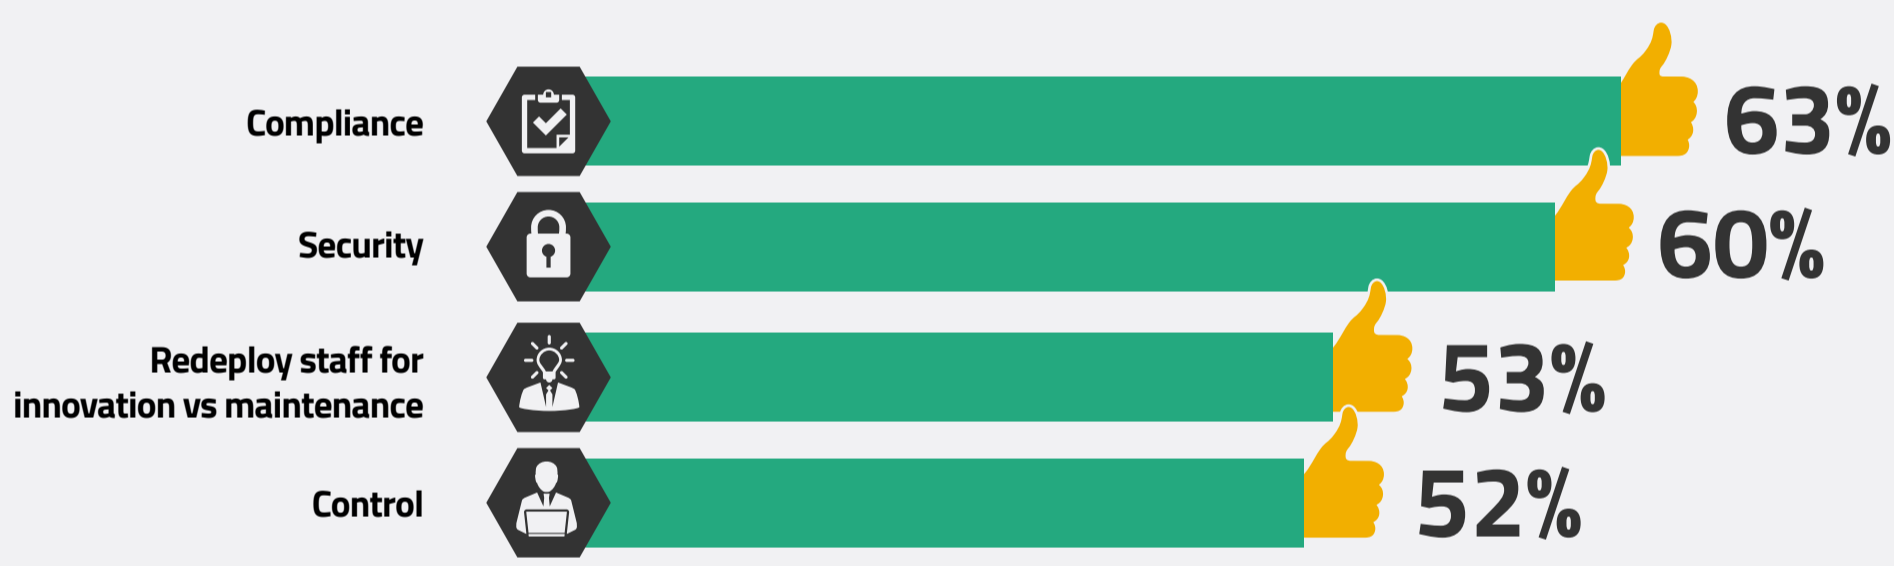

Cost

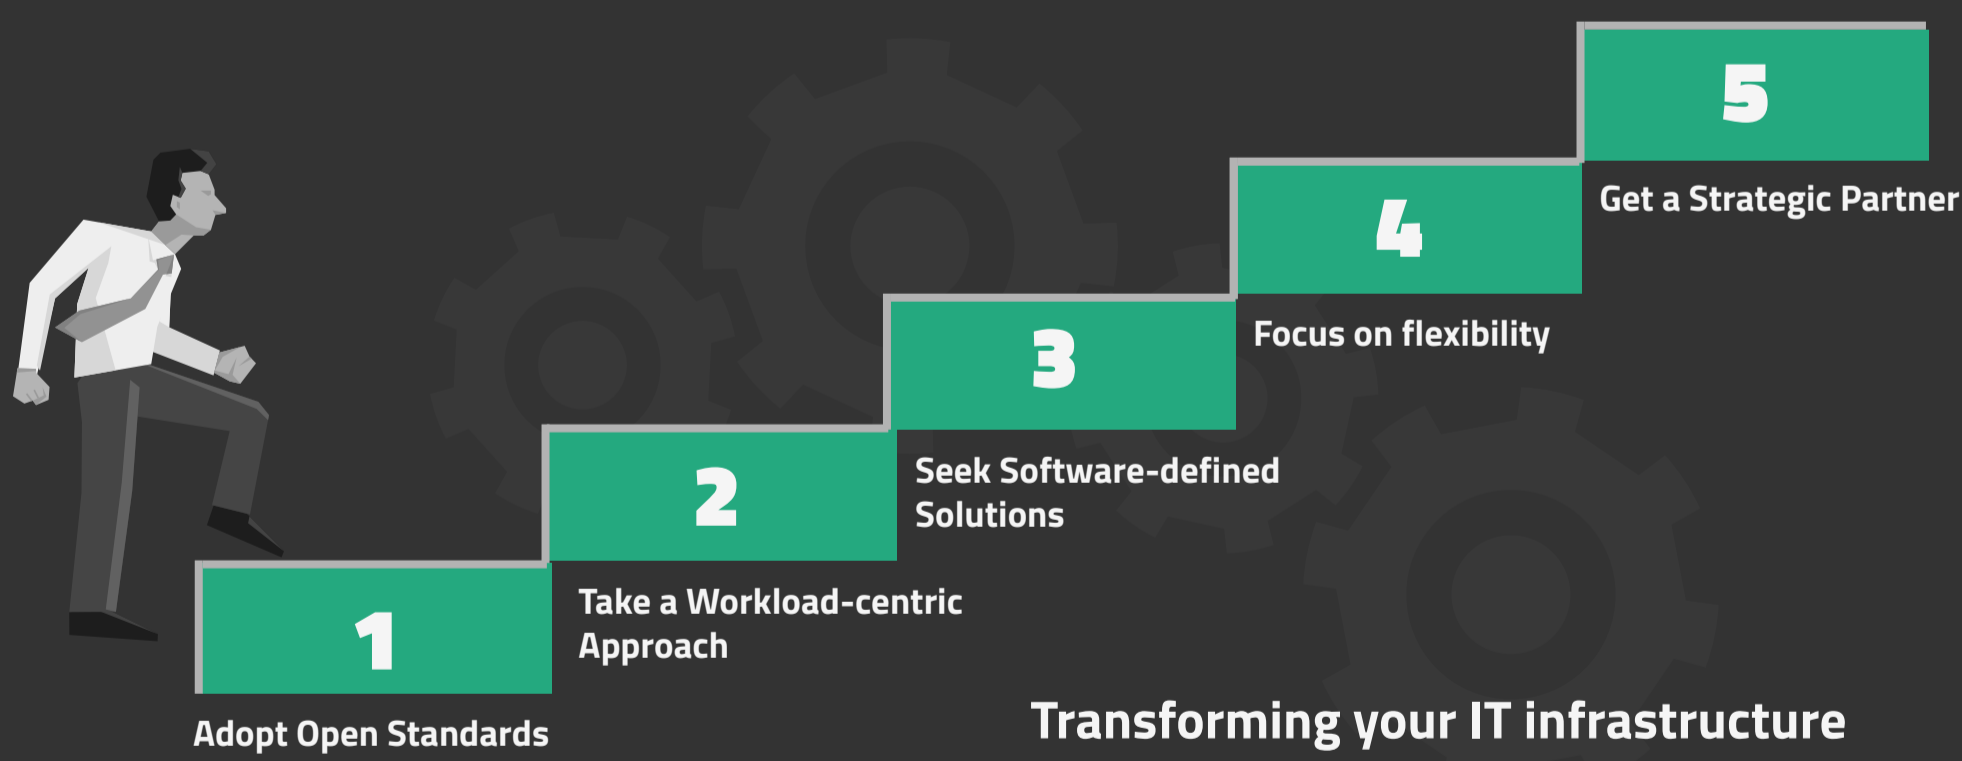

Day-to-day operations are too costly

CIOs are often pressured to seek off-premises IT solutions for perceived convenience and speed.

And yet IT leaders rate the following significant benefits to keeping IT services in-house:

Don't be pressured to go off-premises. You can meet business demands for speed and agility by **using 5 strategies to transform your on-premises IT infrastructure**

Transforming your IT infrastructure can seem a daunting challenge, but one with significant rewards for both IT and the business.
